Portofolio : portofolio-dean-five.vercel.app/ | Bandung, Jawa Barat, Indonesia

PROFESSIONAL SUMMARY

Final-year Accounting undergraduate with a Software Engineering background and a 3.85/4.00 GPA, with hands-on experience in software development through programming training, internships, teaching, and individual and team projects. Experienced in building web and mobile applications using Java, Spring Boot, JavaScript, React.js, Express.js, and PostgreSQL. Familiar with REST APIs, authentication and authorization, database management, and frontend-backend integration. Enjoy learning new technologies, solving problems, and building practical applications.

TECHNICALS SKILLS

Programming Languages	: Java, JavaScript, Kotlin, PHP, C, HTML5, CSS3
Frontend	: React.js, React Router, Tailwind CSS, Thymeleaf
Backend	: Spring Boot, Spring Security, Spring Data JPA, Hibernate, Express.js, REST API
Database	: MySQL, PostgreSQL
Authentication & Security	: JWT, RBAC, BCrypt
Tools	: Git, GitHub, Maven, Postman, Swagger/OpenAPI, Vite
Mobile	: Android (Java/Kotlin), XML Data Binding, Shared Preferences

PROJECTS

PawCare — Full Stack Pet Management Application | June 2026

React.js, Express.js, PostgreSQL, JWT, Tailwind CSS, Multer, Vite

Github: [Backend](#) | [Frontend](#)

- Developed a full-stack web application with separate User and Admin interfaces for managing pet-related information.
- Designed the PostgreSQL database and developed REST APIs to support application features and data management.
- Implemented JWT authentication and Role-Based Access Control (RBAC) using protected routes and authorization middleware.
- Developed 8 data management modules with CRUD operations, search, filtering, pagination, and file upload using Multer.

BookVerse — Digital Library Management System | September 2025

Java 21, Spring Boot 3.5, Spring Security 6, JPA/Hibernate, MySQL, JWT, Thymeleaf

Github: [BookVerse](#)

- Developed a digital library management system with role-based access for Admin and User.
- Implemented JWT authentication, BCrypt password hashing, and role-based authorization using Spring Security.
- Developed a borrowing workflow with four transaction statuses and automated overdue validation.
- Integrated Swagger/OpenAPI, email verification, password reset, PDF report export, and JUnit testing.

Coffee Corner — Cafe Ordering & Management Web Application | December 2025

React.js, Tailwind CSS, Context API, React Router, Framer Motion, Vite

Github: [CoffeCorner](#)

- Developed and deployed a responsive cafe ordering web application with separate Admin Dashboard and User App.
- Implemented shopping cart, order history, favorites, search, filtering, and sorting features with LocalStorage persistence.
- Developed a sales analytics dashboard and interactive user interface using React and Framer Motion.

Taskify — Task Management System (Team Project) | April 2025

Java, Spring Boot, MySQL, Apache POI

Github: [Taskify](#)

- Developed a task management system with separate workflows for Admin and User.
- Implemented email verification, OTP authentication, password reset, and OTP validation.
- Developed file upload/download, pagination, filtering, sorting, and report export to Excel and PDF.

EXPERIENCE

Mobile & Web Developer Intern - PT Nusantara Global Innovation

Feb 2021 – May 2021

- Developed mobile and web application features using Android and REST API under mentor supervision.
- Implemented REST API integration into application features.
- Worked on application development tasks and projects as part of the development process.
- Gained hands-on experience with Android architecture, Dagger, and API integration.

Programming Training Participant, PUB Scholarship Program - Universitas Nasional Pasim

Jan 2024 – Jul 2026

- Completed intensive training in Java, Data Structures, Database, HTML, CSS, JavaScript, and React.js.
- Developed various application projects as hands-on implementation of web development concepts.
- Selected as a Java instructor to assist participants in basic programming sessions.

Android & Web Teacher - Islamic Development Network School

Jun 2022 – May 2023

- Taught HTML, CSS, and PHP as part of web development learning activities.
- Developed responsive web applications for learning and practical activities.
- Supported technology-related activities within the school.

Teaching Assistant - Faculty of Economics, Universitas Nasional Pasim

Sep 2024 – Aug 2026

- Supported teaching activities for Accounting, Taxation, Public Sector Accounting, and Accounting Information Systems courses.
- Prepared learning materials, assignments, quizzes, and examinations based on lecturer requirements.
- Assisted in reviewing and assessing student assignments and examinations.

PUB Scholarship Program Secretary - Universitas Nasional Pasim

Sep 2024 – Sep 2025

- Managed incoming and outgoing correspondence and maintained administrative document archives.
- Coordinated with academic units and related parties for student admission and document administration.

EDUCATION

Universitas Nasional PASIM Bandung

- Bachelor of Accounting | 2023 – Present
- GPA: 3.85/4.00 | PUB Scholarship Recipient

Islamic Development Network

- Vocational High School, Software Engineering | 2019 - 2022
